

ANNUAL BLOOD DONATION AT MARIS HOTELS

Once again the administration and the staff of Maris Hotels responded to the customary annual blood donation - which is an actual contribution to society - that was realized at Creta Maris hotel. The participation, like every year, was universal, demonstrating the importance of the institution for all those who belong to Maris Hotels family.

It is notable that the institution started in 1992, when the hotel management indicated the particularly great lack of blood during summer months and called on staff for voluntary donations. The high response of the staff lead to the annual establishment of the Blood Donation as well as the creation of the Blood Bank at Venizelio Hospital in Heraklion. This Bank serves dozens of surgeries and serious incidents and entitles access to the hotel personnel and their A grade relatives.
