

WORLD ENVIRONMENT DAY AT CRETA & TERRA MARIS CONVENTION & GOLF RESORT

THE PLANET THROUGH CHILDREN'S EYES

On the occasion of the World Environment Day, Creta & Terra Maris Convention & Golf Resort organized a programme for our little friends who were hosted these days at Asterias Childrens' Club of the Hotel.

In the framework of the "International Year of Biodiversity", as the year 2010 was named by the Environmental Programme of the United Nations, a 3-day program of activities was coordinated, including information issues and childrens' expression related to the environment.

In particular, the children were informed in a fun way about ecological matters, built small works of art from recycled and natural materials and painted their own "green" world, showing us in this way their own approach.

Upon completion of their creations, the works of our little friends were displayed at "Kochlias" Restaurant, where the hotel guests had the opportunity to admire and express their wishes for a "greener" planet.
