

## Health and Safety: Two sectors of paramount importance for Creta Maris Beach Resort

Always concentrating on the health and safety of its guests and employees, Creta Maris Beach Resort organized a special training seminar regarding the use of defibrillator (AED), which is now available on its premises. In addition, the hotel introduced its new special hotel fire club car, which was created by the resort's maintenance team in order to take precaution of the guests' safety in case of fire.

More specific, the hotel organized a "Cardio-Pulmonary Resuscitation (CPR)" seminar with the cooperation of Vasco Medical, a company specializing in seminars and trainings, involving the use of a simulator. More than 30 members of the Creta Maris Beach Resort's emergency team (a team consisting of volunteers – employees) were informed about the use and maintenance of the automated external defibrillators and were trained on an immediate intervention in order to save a human's life. This seminar is considered as one of the most important in first aid, as the participants are now able to face successfully a sudden cardiac arrest.

Moreover, in order to ensure everybody's safety, Creta Maris Beach Resort purchased an automated external defibrillator. Furthermore, the hotel introduced its new special fire club-car. This special vehicle is fully equipped with all necessary tools for fire extinguishing.

The two aforementioned actions aim at assuring the safety of Creta Maris Beach Resort's guests and employees during emergencies.
